

SAI RAM BURRI

Quality Engineer – AI & Test Automation | Python | Java | API Testing

+1 343-552-8696 • burrisairam2000@gmail.com • [linkedin.com/in/sairamburri](https://www.linkedin.com/in/sairamburri) • ON, Canada

PROFESSIONAL SUMMARY

Quality Engineer currently working as a Quality Engineer – AI & Test Automation at Cognizant Canada, with prior QA and DevOps experience at Cognizant India. Skilled in Python and Java for building scalable test automation frameworks, performing API and database validation, and supporting CI/CD pipelines in Agile/Scrum environments. Brings additional full-stack and cloud development exposure through applied AI and computer-vision projects. Combines a strong QA automation foundation with AI/ML model validation experience, and is focused on integrating quality practices across the full software development lifecycle.

WORK EXPERIENCE

Quality Engineer – AI & Test Automation | Cognizant Canada

Jun 2026 – Present

- Design and execute automated test scripts using Selenium WebDriver and Playwright (Java/Python) to validate functional, regression, and smoke test coverage across web applications.
- Perform API testing with Postman against REST APIs, validating request/response schemas, status codes, and data integrity across service layers.
- Write and maintain SQL queries for backend and database validation to verify data accuracy across test environments.
- Collaborate within Agile/Scrum teams, contributing to sprint planning, BDD scenario definition, and test case design, and participating in defect triage using JIRA and Azure DevOps.
- Support version control and CI/CD pipeline integration using Git, GitLab, and Azure DevOps to enable continuous testing and reliable releases.

Azure DevOps Trainee | Cognizant Technologies — Chennai, India

Jan 2024 – May 2024

- Designed, implemented, and maintained CI/CD pipelines in Azure DevOps, automating build, test, and release processes, reducing manual deployment effort by ~30% and improving release reliability and consistency.
- Managed source control workflows using Git and Azure Repos, enforcing branching strategies and code review policies across a team of 10+ engineers within an Agile/Scrum delivery framework.
- Tracked and reported pipeline health and release quality via Azure DevOps (ADO), improving defect visibility and transparency across cross-functional teams (developers, QA, and infrastructure).
- Documented pipeline configurations and operational runbooks, reducing onboarding time and promoting knowledge transfer across the engineering team.

INTERNSHIPS

AWS Cloud Intern | AICTE India

Oct 2021 – Dec 2021

- Explored core AWS services — EC2, S3, RDS, and analytics — building foundational cloud architecture knowledge applicable to cloud-based test environment setup and resource management.
- Completed hands-on labs reinforcing cost-optimization and resource management best practices.

Python Programming Trainee | APSSDC India

Mar 2022 – Jun 2022

- Developed Python applications covering data manipulation, file I/O, and process automation — skills directly applicable to writing clean, scalable test automation scripts.
- Applied Python scripting to solve domain-specific problems, gaining insight into how automation integrates into organizational production workflows.

PROJECTS

VisionAI – Cloud-Based Image Analysis System

Full-Stack Cloud & AI Project

- Developed a scalable web-based image analysis application using React, Node.js/Express, and AWS cloud services.
- Designed a three-tier architecture ensuring modularity, scalability, and maintainability.
- Integrated Amazon S3, Rekognition, and DynamoDB for image storage, AI-based label detection, and persistent data management.
- Built RESTful APIs for image upload, analysis, and history retrieval, enabling seamless frontend-backend communication.
- Implemented an end-to-end workflow to process images, generate confidence-based labels, and display results through a responsive UI.

Spoken Digit Recognition in Telugu — CNN Deep Learning

Nov 2023 – Feb 2024

- Built an end-to-end CNN pipeline to classify spoken Telugu digits (0–9) from audio clips; validated model accuracy, robustness, and edge-case handling — directly applicable to QA on AI-powered applications.
- Applied MFCC feature extraction via Librosa; trained and evaluated models using TensorFlow/Keras and Scikit-learn; documented failure cases related to bias and misclassification to ensure model reliability.

E-Commerce Platform — Kettle Products (Capstone)

Sep 2024 – Jan 2025

- Developed a full-stack, responsive e-commerce application (HTML, CSS, JavaScript, Flask, MySQL) and executed functional, integration, and regression testing to ensure end-to-end system reliability.
- Performed database testing by writing and optimizing SQL queries for data integrity validation, improving query performance and application responsiveness.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript (ES6+)

Testing: Functional, Regression, Smoke & Integration Testing, BDD, STLC, Test Case Design, Defect Tracking & Reporting

Automation: Selenium WebDriver, Playwright, PyTest

API Testing: REST APIs, Postman, Swagger/YAML

Web Development: React, Node.js, Express.js, RESTful API Design

DevOps / CI-CD: GitLab, Azure DevOps Pipelines, GitHub Actions, CI/CD

Cloud: AWS (EC2, S3, Lambda, Rekognition, DynamoDB), Microsoft Azure

Databases: SQL Server, MySQL, DynamoDB — schema design, complex queries, data integrity validation

Version Control: Git, GitHub, GitLab, Azure Repos

AI / Machine Learning: TensorFlow, Keras, Scikit-learn, CNN Architectures, MFCC/Librosa, NumPy, AWS Rekognition (Computer Vision & Label Detection), AI Model Validation & Evaluation

Tools: JIRA, Azure DevOps (ADO), VS Code, IntelliJ IDEA, MS Office

EDUCATION

Post Graduate Diploma — Full Stack Development | Lambton College, Ottawa, Canada

Aug 2024 – Apr 2026

GPA: 3.6 / 4.0 | Data Structures & Algorithms, Python, Java, C#, DBMS, Front-End Development, Big Data Analytics

Bachelor of Technology — Computer Science Engineering | Lakireddy Balireddy College of Engineering, India

Aug 2019 – Apr 2023

CGPA: 8.68 / 10 | Python Programming, Algorithm Design & Analysis, OOP with Java, DBMS, Big Data Analytics

CERTIFICATIONS

- AWS Academy Cloud Foundations — Amazon Web Services
- Data Analytics with Python — NPTEL
- Programming for Everybody & Python Data Structures — Coursera (University of Michigan)
- Introduction to Cybersecurity — Cisco Networking Academy
- Blockchain Technology and Application Development — Chariot
- Wipro Talent Next — Wipro Technologies
